## Built In Anti Slam DOUBLE SIDE

**WARNING:** All sliding doors, if unprofessionally and recklessly handled, can be dangerous also depending on the size and characteristics of the panel and of the material of which is made. For safety reasons, our counterframes are equipped with adjustable door catch. In order to avoid the risk of injury it is absolutely necessary to install it, taking care to stop the door, so that the handle stays completely on sight and the hand, while holding and using the handle, and based on the sizes and characteristics of the latter, can never come into contact with the edge of the counterframe or with projecting and/or reentering accessories, decorations or other characteristics of the door panel.

In the event of non-observance of these warnings, which must be communicated by the installer and/or vendor to the end user, Eclisse Srl disclaims all liability for any injuries.
